# Finding your patient

How do I search for a patient in DoseMeRx?

Written by Sharmeen Roy, PharmD, BCPS

Updated over a week ago

Once you log into DoseMeRx you will be brought to the Patients tab. All of your patients will be displayed on this tab of DoseMeRx. Active patients will be displayed automatically, but you can switch to the archived patient list by selecting 'Archived' on the patients tab. Patients are displayed in order of the most recently modified date.
