Calculate next dose with DoseMeRx

Calculate an individualized, patient-specific dose in DoseMeRx

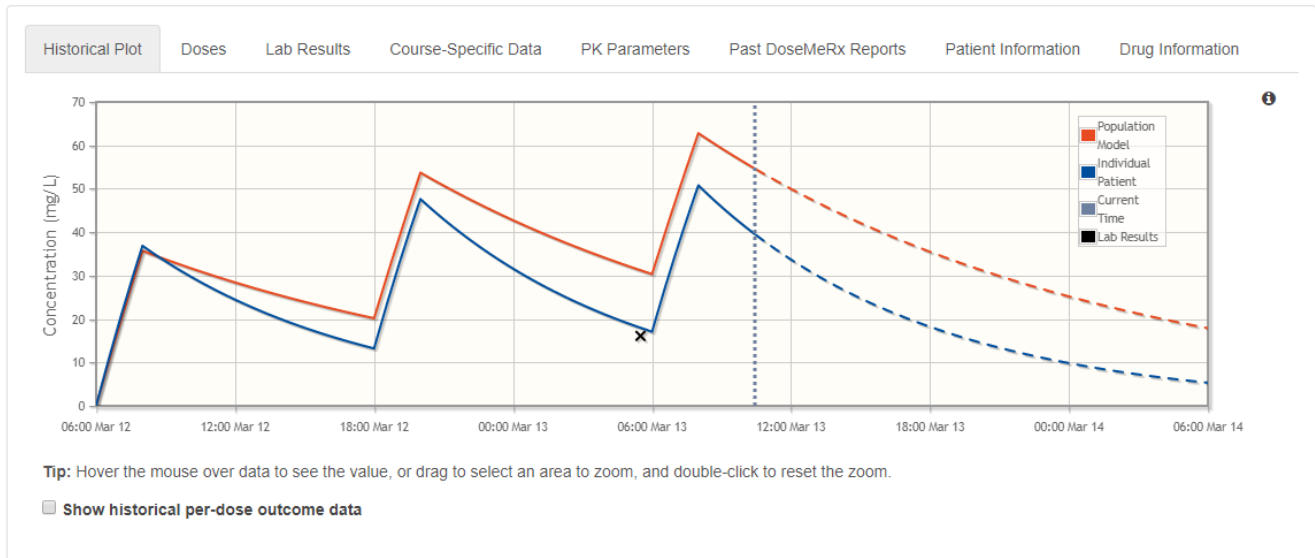

Written by Sharmeen Roy, PharmD, BCPS

Updated over a week ago

Once you've added previous doses and/or lab results, now you're ready to experience the true power of DoseMeRx to calculate your patient's next dose individualized to them and your target.

From the [historical plot tab](#), select calculate next dose and enter the time you would like to administer the dose.

[Calculate Dose](#)

Tip: If you're logged into DoseMeRx select Help from the top menus, where you can watch our on-boarding videos which quickly show you how to easily calculate the next dose.
